Programs Used to Download Instagram Videos or IGTV Videos To download unlimited private videos from Instagram use Gramvio video downloader. Can I Download as many Videos as I want? Yes, you can use Instagram video download feature 24/7 without any restriction. The video downloader can be accessed by any desktop or ios device. All you need is to grab a link to the post. Whats is Instagram? Instagram is a social network just like Facebook, Twitter, Snapchat created in October 2010 by Kevin Systrom and Mike Krieger. The app was instantly hit because it was fun to edit, upload, and share videos and pictures on Instagram in a very creative way. Instagram is currently ranking number 2 on the list of the largest social networks. On Instagram, you can post a square-format as well as other proportion format videos and photos. Instagram allows you to create a personal or business account. You can maintain a cool Instagram bio to attract more followers. It allows you to post several hashtags with your posts which can then be reached to the relevant audience. On Instagram, you can maintain a story line of your favorite memories to be shared with your friends and family. Instagram users can communicate with each other by using a direct message option (DM). It also shows the stats of your followers and the people who you are following. Nowadays, you can express what you feel with a single Instagram photo or a video. Later, you can share the link to make your Instagram video go viral. The app is available on both iPhone and android app stores which is available to download for free. Yes, you can use Instagram Video Downloader online at a zero dollar fee. If you want to save all of a profile's content at once, without limitations, you need to subscribe to the Premium Downloader of profiles. It's paid: first 3 days for £1 (trial), then £8/month for 10 profiles, €42/month for 100 profiles, and €86/month for an unlimited number of profiles to download. Instagram video downloader is a tool that allows you to download Instagram videos without any fee. The liberating part of this feature stems from the ease of use and practicality. Even though Instagram itself does not provide such a feature, many users are desperate for one. That is why we, as Instafollowers, agreed upon creating a feature that enables you to download Instagram videos wherever you are and whenever you desire. No fee charged, no ad shown and no password required. All you need to do is enter your username, select the video you want to download and click on download.In almost all social media platforms, the videos users share are not allowed to be downloaded. It is because downloading people's content puts a lot of extra load on the server and damages privacy and legality. For this reason, it is not possible to download Instagram videos as a default option. Likewise, you cannot download video content on other platforms like YouTube, Facebook, Twitter, etc. Did you ever need to download a video that you enjoy watching on Instagram? Do you need an Instagram Video Downloader, which is entirely free to use? Then you are in the right place. Downloading videos from Instagram sounds good. You can do it online very quickly with the Instagram video downloader. Our service is entirely free and 100% safe to use. You can do it entirely anonymously; you do not even have to sign up and become a member of our site. You can download all the videos of that user if you enter the desired Instagram account's username. However, the Instagram account of the person you chose to download their videos must be open to everyone for viewing. Otherwise, you can not download videos of people with protected accounts. It is an essential rule that you should keep in mind.Instagram Video Download Feature: Why Doesn't It Exist?Why doesn't Instagram allow you to download videos? Well, this situation is entirely due to company strategy and privacy. Downloading videos that belong to other users make the servers so busy that they increase the costs. Although Instagram is a mighty company, it is still understandable for them to cut extra costs because it is technically very burdensome.But don't worry about it. Even if Instagram doesn't allow it, there's a different way to do it. As InstaFollowers, we value our customers' needs and very glad to be able to help you. From this webpage, you can download every single Instagram video you want to download. We offer this service for 100% free. Some 3rd party applications also offer to download Instagram videos. Most of these applications are paid, so if you need a free solution, those are not for you. Also, remember that many websites or apps that claim to have this feature are scams and can steal your vital information. When you install a third-party app, some security issues can occur. But using the InstaFollowers website is proven to be 100% safe and secure. We concentrate on the quality of the service we offer. We do not collect data or save any of your personal information. In short, our web service is always better and safer to use than another website that you will not be sure of its security or with an application that you have to download on your mobile device (which will use the storage of your phone).You can find hundreds of websites online and applications in the application markets like App Store or Google Play Store. Some of them may be working with no problems, but usually, a significant portion of them are scams, and it is not a good idea to download them; they can steal all your information, even credit card details, and steal your money. So you can put yourself in danger because of curiosity and trusting to scam apps. Some of the apps are not free to use, so why would you spend your hard-earned money while you could do it for free? With InstaFollowers, there is no need to pay. You may also need to grant some permissions to these applications, and they will usually ask you to be a member of the application (to sign up as a member, you need to give them information about you like your mail address, location, etc. Some shady apps can even ask for more like to be able to access your call logs, messages, etc. Never trust them). That's why we recommend that you always choose to do it online. It is faster and safer.If you use InstaFollowers' service to download Instagram videos, within a few seconds, you can download any videos you want from Instagram to your computer, mobile phone, or any other mobile device. There is no limit to downloads or for video size. If the account is public (visible for everyone to view), then you can enter the user name and start downloading. You can list all the videos on an Instagram account and download them according to your preference. Your download speed may vary depending on your current processing intensity and your Internet connection. Downloaded videos are taken from Instagram users' accounts, and the responsibility for the use of those videos belongs to these accounts. Please note that this tool that allows you to download Instagram videos anonymously and is not affiliated with Instagram in any way. You can download and save Instagram videos, but the content still belongs to their respective owners.When you download the desired Instagram video with InstaFollowers, your new file gets directly saved to your device's internal storage. So you can browse and display the video as many times as you want with the highest standard quality. Instagram can never find out that you download content via our service, so the process will not bring you any harm when you download Instagram videos. However, you should always be careful. It is not illegal or prohibited to download Instagram videos, but you should still ask for consent from the original poster. If you did not manage to obtain permission to download, you should consider not doing it at all.We repeat, InstaFollowers act entirely anonymously, so Instagram will not find out that you are downloading some users' content. But if you share their content online, you can put yourself at the risk of being found, and in a case like that, the owner can report you.Is There Such Thing as Instagram DM Video Downloader?No, Instagram DMs are private and only can be accessible by the sender and the receiver. As InstaFollowers, we can not and will not access hidden conversations. We keep it 100% legal and only help you to download videos that are public, which means that the owner is okay with their content to be seen by everyone. With our free and best video downloader service, regardless of the video size, you can easily download the video you want from the desired account. Follow this step-by-step guide to download Instagram videos from our web site successfully:Enter the username of the Instagram user that owns the videos you want to download to the given box. Or, you can directly copy and paste the desired video's URL. To do this, you need to view Instagram from the PC, open the video that you want to download, and copy the address from the address bar.Click the download button.Depending on the connection speed and server connection, you will see the list of Instagram videos of the user as soon as possible. Or if you pasted the desired video's URL, you will only see that video.View the video(s) and choose the ones you want to download. If you want to download a video, click on the download button under it, and it will open in a new tab automatically. Right-click on the content and click on the Save video as... option. Then choose the directory and download the video on your preferred device.If the user profile is hidden (accounts that are not publicly visible to view their content without the consent of the user), you cannot do this. You can only download the videos that belong to users with open-to-everyone accounts. You will receive an error message if you enter a protected account.The multi download is not supported yet, so you need to download the videos one-by-one.You can use this service anonymously without being a member of our site. There is no daily use limit.The videos you download via this service are kept in the same quality. No changes in video quality are made so that you can download them in a high-quality mp4 format.How to Download Instagram Videos on PC?After you have copied the username that you want, paste it on the box at the top of the page on our Instagram videos downloader page.When you are complete with pasting the username, click on the 'Download' button to proceed.Once clicking on the button, you will see all of the current videos of the selected account. Pick the one you want to download by clicking on it.After you click on the 'Download' button, the video will open in a new tab. Click on the three dots under the video.After you click on the three dots, you can either watch the video in full screen or download the video. Click on the 'Download' icon to save the Instagram video.How to Download Instagram Videos on Mobile?To download Instagram videos, enter your username and then press the "Download" button.Select the video you want to download from the videos you see and press the "Download" button below.The video you want appears in a new tab. Here, press the "Download" button. The video you want will start to be downloaded.Instagram has come up with a new feature called reels. These are short videos like stories; however, they don't disappear. The good news is you can download Instagram reel videos with this same tool. You don't have to look for a separate Instagram reels downloader tool. The steps to download reels videos are similar to the steps above. Here they are:Find the reel video, or you want to download and copy the link of the video.You can also copy the link of the Instagram profile.Then paste the copied link onto the same box you use to download videos.Click on the download button, and you will see the Instagram reel video you want.After seeing your desired video, click on the download button once again to save Instagram reels to your device.We hope you like our service. For any questions or problems, our WhatsApp customer care service is 24/7 online and ready to assist you. Thank you so much for reading. Check out our other service if you want to download Instagram Stories too.How to use the downloader tool for Instagram videos?
