Use Explosive/Bombs when required While you have to drop the explosives onto the monsters, make sure you don't leave them unused. Keep an eye on the number of explosives you are left with and don't refrain from using them when you sense an attack. Sometimes when you feel that you are unable to respond to the number of enemies coming to you during the battle, don't think and use the explosives. 2. Take advantage of multi skills With the help of your shotgun, you can maximise the potential of getting multi kills. The spread range can be used to kill multiple monsters at a time in close quarters. Trick: Tap anywhere in the mid air (not directly the monster/enemy), and it will do a bigger damage. You can try this trick when you are equipped with that spread range shotgun. 3. Refrain from using coins to unlock weapons In a hurry of unlocking weapons, players tend to waste coins. Don't waste them, rather conserve the coins for upgrading the already unlocked weapons. 4. Prioritise the weapon you want to upgrade Just like we mentioned it in spending coins, you should prioritise your coins to spend in upgrading your weapons rather than unlocking. Also, keep buying explosives which will help you fight monsters. 5. Learn to use the right weapon Every weapon has its own feature. You need to select the right one at the right place. For example, when your target is long range then do not use shotgun or uzi. Select the right weapon instead. 6. Manage your reloading time Avoid the reload during open or ongoing battles. The time factor becomes very significant in case of weapons like shotguns. Hence, make the slots full before commencing to fire. 7. Prioritise killing animals based on the damage they can make If you get to face a number of monsters simultaneously, try to figure out that which of them can make the most of the damages (based on previous experiences). You need to kill the one that is making serious damage to your health in the first place. 8. Farm funds from the easiest for you The best way to grind for more coins to use on what you need in battle is to go back and play the easiest level for you repeatedly. This is not by going to the very beginning, the trick here is to analyze the easier challenge from the previous stage. So the latest it is from your current level the better since it can offer you much coins compare to the very beginning level but also consider the difficulties of it and the time of how long it takes for you to clear the stage. 9. Find Inactive Players Sometimes, when you spot some inactive players, it becomes a good source of earning coins by making an attack.
