Download for Windows Download for Chrome OS Download Manual Logitech manufactures wireless keyboards that your business can use to replace the stock keyboards that comes with your computer. Wireless keyboards offer a larger range of motion than wired keyboards, and eliminate some of the clutter around a keyboard. Logitech wireless keyboards come with a small USB receiver, which, when plugged into your computer, connects with the keyboard to receive the input. No special software is needed to use Logitech keyboards, though the receiver will install drivers when it is first plugged into the computer. You can use Logitech Unifying software to connect your keyboard or mouse to your computer. NOTE: If you don't already have it installed, you can download Unifying software from the Software Downloads page. Launch the Logitech Unifying software. Windows: Start > Programs > Logitech > Unifying > Logitech Unifying SoftwareMacintosh: Application / Utilities / Logitech Unifying Software At the bottom of the Welcome screen, click Next. NOTE: These instructions use Windows screenshots for a keyboard. Macintosh will look slightly different, but the instructions are the same for keyboard or mouse. When you see the "Restart the device..." window, follow the on-screen instructions to turn your device off and then back on. When your device is detected, you'll see a "We have detected your..." confirmation screen. Type a test message in the field provided to make sure it works.If your device connected successfully, click Yes and then Next. If your device doesn't work right away, wait a minute to see if it connects. If it doesn't, select No and then click Next to restart the pairing process from Step 1 above.Click Finish to exit the Logitech Unifying Software (or Pair Another Device to pair additional devices). Your device should now be connected. Was this article helpful? 0 out of 0 found this helpful Increase productivity with this Logitech MK520 wireless keyboard and mouse combo. A Unifying receiver connects the two devices to your laptop wirelessly for a clutter-free workstation, while the long battery life keeps each device working smoothly.Type of ... Show More Svenska 21Logitech® Wireless Combo MK520BatterihanteringSå här kontrollerat du musens batterinivå:Stäng av musen och slå sedan på den med av/på-reglaget på undersidan. Om indikatorn upptill på musen lyser grönt i 10 sekunder så är batterierna laddade. Om indikatorn blinkar rött så har batteriets laddning sjunkit till 10% och det finns bara några dagars laddning kvar.* Batteriets livslängd varierar beroende på användning och datorsmiljö. Flitigt dagligt bruk förkortar batteriets livslängd.Så här kontrollerar du tangentbordets batterinivå:Håll ner Fn-tangenten och tryck på F12: Om indikatorn lyser grönt är batterierna laddade. Om den däremot blinkar rött så har batteriets laddning sjunkit till 10% och det finns bara några dagars laddning kvar. Du kan även stänga av och slå på tangentbordet via reglaget längst upp.Musens undersidaAv/på-reglageIndikatorMusens ovan sidaOm batterierna är fulladdade kan du använda tangentbordet i tre år och musen i ett år*.VilolägeVisste du att tangentbordet och musen försätts i viloläge om du inte använder dem under ett par minuter? På så sätt ökar batteriets livslängd, och du slipper hålla på att stänga av och slå på dina enheter hela tiden. Båda enheterna vaknar till liv så snart du använder dem igen. Page 4 English 15 Logitech® Wireless Combo MK520TroubleshootingKeyboard and mouse are not workingCheck the USB connection. Also, try changing USB ports. Move closer? Try moving the keyboard and mouse closer to the Unifying receiver, or plug the Unifying receiver into the receiver extender cable to bring it closer to the keyboard and mouse. Check battery installation. Also check the battery power of each device. (See Battery management for more information.)On the mouse bottom, slide the On/Off switch right to turn on the mouse. The Battery LED on the mouse top case should light green for 10 seconds. (See Battery management for more information.)Mouse bottomOn/Off switch Page 5 English 13 Logitech® Wireless Combo MK520Battery managementHow to check the battery level for the mouseTurn the mouse off then back on using the On/Off switch on the mouse bottom. If the LED on top of the mouse glows green for 10 seconds, the batteries are good. If the LED blinks red, the battery level has dropped to 10% and you have only a few days of battery power left.* Battery life varies with usage and computing conditions. Heavy usage usually results in shorter battery life.How to check the battery level for the keyboardPress and hold the FN key, then press the F12 key: If the LED glows green, the batteries are good. If the LED glows red, the battery level has dropped to 10% and you have only a few days of battery power left. You can also turn the keyboard off then back on using the On/Off switch on top of the keyboard.Mouse bottomOn/Off switchLEDMouse topYour keyboard has up to three years of battery life and your mouse has up to one.*Battery sleep modeDid you know that your keyboard and mouse go into sleep mode after you stop using them for a few minutes? This feature helps limit battery usage and eliminates the need to keep switching your devices on and off. Both your keyboard and mouse are up and running immediately once you begin using them again.
