Your help will be much appreciated!Need help finding a remote code to work with your Toshiba TV? Please leave your question below and we can assist. Remote control not working with TV! My TV will not respond or change channels using the TV remote. How do I reset the remote control or troubleshoot the TV remote sensor? I have a Samsung Smart TV and for 1 year the remote never had a problem controlling the TV. I am using the original remote control that came with my TV, not a universal remote. Can I reset the TV or the remote control to solve this issue?How To Reset A TV Remote ControlA remote control that will not respond or control your TV usually means low batteries. Make sure you are pointing the remote at the TV. There also may be something interfering with the signal such as other electronics, certain types of lighting, or something blocking the TV remote sensor.Fix A TV Not Responding To Remote1. Change the remote control batteries (AAA or AA batteries)with new high quality batteries.2. Reset the TV by unplugging the TV power cord from the wall outlet.3. Wait 5 minutes and plug the TV power cord back into the wall outlet.4. Check to see if the remote now works with the TV.If still not working, see below...Change The Batteries On Your TV RemoteReset The TV Remote ControlCertain TV remotes can "lock-up" and not respond to your inputs. TV remote controls can be reset by simply removing the batteries. Remove both batteries from your TV remote control to perform a reset. This would be a good time to change the batteries in the remote to be sure it has sufficient power. Once the batteries are removed and replaced, try pointing it at the TV and pressing the power button. Did the TV turn ON? If so the TV remote is fixed. If not, keep reading below...Reset The TelevisionRemove power to the TV. Gently pull the power plug from the electrical wall socket that goes to TV. This turns the TV off and will reset any issues that might cause the remote to not work properly. After 5 minutes plug the TV power cord back into the wall outlet. Test to see if you can turn the TV back ON with the TV remote control. If the TV turns ON, the issues is resolved. If the TV remote does not turn the TV back ON, press the small power button on the TV itself to turn it back ON. Try the TV remote again by testing the volume buttons. Does the TV volume change? If not see below...If this issue just started happening, make sure you installed the batteries in the remote control correctly. Be sure the recently installed batteries are not weak or dead. Always use the same brand and type of batteries to ensure higher performance.Remote Control Battery Replacement Fixes ProblemTV Remote Not Working - How To FixGet Remote To Work With TV1. Ensure the area where you are using the remote to control the TV is free of any objects that could interfere or block the beam when attempting to control the TV.2. Be sure the remote control is emitting the signal. Use a your mobile phone camera and check the emitter on the front of the remote control. Press a button on the remote to see if you see a red light. If you see the red light, it means the remote control is working. If no red light is seen, the remote has dead batteries or is defective and needs to be replaced.3. Inspect the television infrared beam receptor (remote sensor on the TV itself) and clean it to be free of dust or possibly a small sticker or other object may be covering it.4. Ensure the TV software is up to date. On some TVs, older TV software can have an effect on the remote control. If your remote does not work, most TVs have a small controller on the back of the TV that works similar to the TV remote control. Use this to navigate to the menu and update the TV software or firmware to attempt to get the remote working.5. Temporarily turn off any fluorescent lights or overhead lights near the TV. Certain fluorescent lights or LED bulbs can interfere with the remote control signal and cause it to malfunction.6. Certain electronic components can cause interference with the remote signal. Turn off any external components near the TV to see if they are causing the remote control "NOT WORKING" issue.How to Fix Any TV Remote Not WorkingBuy NEW Remote Controls For TV BLURAY CABLE SOUNDBARHOW TO RESET YOUR TV REMOTE CONTROLMORE TELEVISION HELP - TV Turns Off By Itself - TV Will Not Connect To WIFI - Television Screen Turns Black- Fix A TV Screen Zoomed In - TV Says NO SIGNAL - Fix Slow Remote Control With Cable BoxIf the above steps to fix a remote control not working with your TV did not solve your issue, please leave a comment below with the TV model and type of remote you have and we can assist. By Randy Harward Edited By Mike Strayer Does using your new DIRECTV remote have you scratching your head? We've made a step-by-step guide to help you get it paired and ready to go. If your DIRECTV remote stopped working, a simple reboot may resolve the issue. Here's how to reset your DIRECTV remote control. Locate the reset button. This is a small red button located inside the access card door, or, on some models, on the side of the receiver. No button? Go to step 3. Push the button. Wait 15 seconds. Go to step 4. Unplug your receiver from the wall outlet. Wait 15 seconds, then plug it back in. Try your remote. If that doesn't work, try the following: Move anything that could be blocking your remote's infrared light from reaching the receiver's sensor. Even the glass door on your entertainment center can cause interference. Using a microfiber or other lint-free cloth, wipe away any greasy fingerprints or nacho cheese streaks from your remote's emitter and the receiver's sensor. Keep your receiver and remote out of direct sunlight. Also, try turning down the brightness on your TV. Bright light can interfere with your remote's signal. Depending on how long you've been a customer and what equipment you have, you probably have one of two DIRECTV remotes: a standard universal remote control or the DIRECTV Genie remote. If you have a DIRECTV Ready TV, that's another pairing process that we spelled out below, too. We'll start with the universal remote. Your DIRECTV universal remote control can control up to four devices, including DVD/Blu-ray players, DVRs, gaming consoles, soundbars, and TVs. Here's how to program your remote for both SD and HD receivers and how to change your TV's input source. Press a button on your DIRECTV remote. On the on-screen menu, select Parental Favs & Setup > System Setup > Remote or Remote Control > Program Remote. Select the device (DVD/Blu-ray player, DVR, gaming console, soundbar, TV, etc.) that you want the remote to control. If your device isn't listed, enter a DIRECTV remote code. Find them by using this code lookup tool. Follow the on-screen prompts to complete the process. Great news! You can use the exact steps above to program your DIRECTV universal remote control for an SD receiver. Slide the mode switch (located at the top of the remote) to TV. Hold down the Mute and Select buttons at the same time. Let go when the green light flashes twice. Enter 960. The green light should flash twice again. Slide the mode switch to the DIRECTV logo. DIRECTV doesn't have internet but we can help you find the best internet service to bundle with your DIRECTV TV service. Find the best internet for you If you have a Genie remote, there are both automatic and manual pairing processes—plus a third option for DIRECTV Ready TVs. We'll start with the automatic pairing process. These instructions will help you program your DIRECTV Genie remote automatically. Point the Genie remote at your Genie HD DVR, Genie Mini, or Wireless Genie Mini. While you continue to aim the remote at your device, hold down the Mute and Enter buttons. Let go with the remote's green light blinks twice. The TV should display "Applying IR/RF Setup." That means you're in RF mode—it's time to program the remote. Turn on the device you're pairing with your remote. Press Menu on the remote. Select Settings & Help > Settings > Remote Control > Program Remote. Follow the on-screen instructions to complete the pairing process. If this method didn't work for you, don't stress. Use the instructions below for manual pairing. Point the Genie remote at your Genie HD DVR, Genie Mini, or Wireless Genie Mini. While aiming the remote at your device, hold down the Mute and Select buttons. Let go when the remote's green light blinks twice. Enter 961. Press the Channel Up button. Press Enter. When you see "Your remote is now set up for RF" on your TV screen, select OK. Turn on the device you want to pair. Press Menu. Select Settings & Help > Settings > Remote Control > Program Remote. Select the device you want to pair and follow the on-screen instructions to complete the process. Your remote should now be paired and ready to go! A DIRECTV Ready TV, when connected to a Genie DVR, allows you to watch DIRECTV without an extra Genie or Genie Mini. Here's how to pair a DIRECTV Ready TV with your Genie remote: Point the remote at your Genie DVR. Press and hold Mute and Enter. Let go when the green light blinks twice. The TV screen will display the message "Applying IR/RF Setup." Turn on your DIRECTV Ready TV. Hold down Mute and Select. Let go when the green light blinks twice again. Enter the manufacturer's code for your DIRECTV Ready TV. Here are TV codes for Samsung, Sony, and Toshiba: Samsung TV Code: 54000 Sony TV Code: 54001 Toshiba TV Code: 54002 For other manufacturers, use the DIRECTV website lookup. Your remote should now be paired and ready to go! With your remote paired and devices active, you're ready to set aside this guide and enjoy your DIRECTV service. If your remote still won't work with your device(s), visit DIRECTV's remote troubleshooting page or contact DIRECTV technical support at 1-800-531-5000. Happy watching! You can use your phone or tablet as a DIRECTV remote via the DIRECTV app, which currently supports the receiver models HR20, HR21, R22, HR23, HR24, HR44, H21, H23, H24, and H25. Find out which DIRECTV receiver model you have. Reasons that your DIRECTV remote might not work include dead batteries, stuck buttons, faulty parts, incorrect mode settings, receiver location, blocked sensors, and other problems. We suggest visiting DIRECTV's remote troubleshooting page for solutions. You can use the DIRECTV remote code lookup tool to find the codes used to pair your DIRECTV remote with your TV. For example, to program your DIRECTV remote for a Samsung TV, you would follow these instructions (link leads to the list in this article). In Step 3, you'll use the lookup tool to find the TV codes make and model of your television. It's not unusual to have several codes for the same television. Try each code until one works. When it comes to entertainment, TV is still the number one choice for most people. Despite the internet has become a staple for every household, the need for television and cable subscription cannot be put behind. Cable service providers are widely available in urban areas offering HD programming, video on demand, and hundreds of channels. Optimum TV by Alice is one of the top service providers in the United States offering cable, internet, and telephone services all under one roof. Optimum top TV packages namely Alice One Double Play, Alice One Triple Play, and Premier TV are devised to fulfill the wishes of consumers of diverse needs. No matter, what plan you choose, the icing on top is that you will get free HD programming on all of its packages. Apart from that, you will also be getting a cable box along with a remote. If you are using the cable service for the first time, then setting up might not be as simple as switching on the television and start watching whatever you want. You need to set up or program Optimum remote to switch channels, turn the volume up and down, and other functions. Let's look at Optimum remote features first. Optimum Remote Features Optimum remote can be programmed to control your TV functions including power, mute, and volume with ease. Optimum remote features help make TV viewing more entertaining and pleasing. TV Input Button on your Optimum remote allows you to switch to other connected devices to your television including a Blu-ray disc player, cable box, and more. The on-demand button will take you to the library of movies and TV shows you can watch during your free time. The search button helps you find what you wish to watch without wasting any time. Now we are going to guide you on how to program Optimum Remote to TV. Whether you have an Altice remote with a Netflix button or an Altice One remote, you will find a detailed guide on each remote. Let's get started. How to Program Optimum Altice Remote to TV (Altice One with Netflix Button) If you pair the remote to Altice One via Bluetooth, you will be able to control it using voice command. You will also be able to control the box, even if it is not in your sight, and allow you to control if you are 30 feet away. So here's how to program Optimum Altice remote to the TV. Find the "A Button" on your remote and press Select "Settings" from the home screen At the bottom of the screen find the remote icon and select it Select Pair Remote to Altice One and follow step by step instructions on the screen Now press "Pair Remote Control" You will get confirmation when the remote is paired Bear in mind that the remote will only work with the paired Altice One Mini or Altice One. In case, you have several boxes at home, you cannot use the same remote that was paired with the first box. Programming Altice One remote will allow you to control your TV without any difficulty such as turning the volume up and down, switching channels, and power functions. We have listed TV brands below. If you have any of the following TV sets, make sure to program your remote with the given steps below. However, if the brand is not on the list, just use the Auto-Search Programming Method and follow the steps. Brand Code Insignia 1 LG 2 Panasonic 3 Philips/ Magnavox 4 Samsung 5 Sanyo 6 Sharp 7 Sony 8 Toshiba 9 Vizio 0 Power on your television Press the power button along with the number for your brand for at least three seconds and release. It will turn the status light on Now power off your TV by pressing the TV power button Press select to store the code, which will turn off the status light Verify the code by pushing the Power Button again Check whether the remote is functioning properly like mute and volume functions If the remote is unable to control basic functions, make sure to try Auto-Search Programming. Even if it is still unable to control, try the four-digit code programming method given below. How Do I Program My Optimum Remote to My TV using Auto-Search Programming Method? If one digit method isn't working, no problem, there are still ways to program Optimum remote to the TV. Here is how to connect Optimum remote to the TV using Auto-Search Programming Method. Power on your television Press Volume Button and Power Button simultaneously for three seconds until the status light turns on. Release the buttons after the status light up. Press and release the number 1 key and turn off the TV by pushing the TV button Press the Select button to store the code after the television turns off. The status light will also be turned off. Verify that the remote is working for mute, power, and volume functions. If the remote is not working for mute, power, and volume functions, try the four-digit programming method given below. How to pair optimum remote to TV using Four Digit Code Programming Method? Turn on your TV and find your TV brand for a complete list of codes. Press TV and Select buttons for at least three seconds and release, which will turn the status light on. Enter the four-digit code corresponding to your television brand, which will turn off the status light. Find the complete list of Optimum remote TV codes here. Test the power function of the TV Repeat steps 2 and 4 until the TV starts to function properly and the correct code is entered. How do I Unpair Optimum Altice Remote Control with Netflix Button If you wish to use paired remote with other cable boxes in your home, make sure to unpair it. Here's how to unpair Altice remote with a Netflix button. Press and hold 7 and 9 simultaneously on remote The light will start blinking and turn off indicating that it is unpaired successfully The remote is back in IR mode, which means it can be used with other cable boxes Keep in mind that the unpaired remote does not support voice commands. How to Connect Optimum Remote to TV (Altice One) If you have Altice One remote, here's how to connect Optimum remote to the TV. Just keep in mind that the remote will work on only one device. If you have multiple devices at home, you need to unpair your remote to make it functional for the second one. We will also discuss how to unpair Altice One Remote. But first, let's check how to connect Altice One Remote to TV. Push A or Home Button on the remote Select "Settings" from the home screen Click on the remote icon found at the bottom of the screen Select "pair remote to Altice One" Follow the step by step instructions on the screen Select pair remote control A notification will appear confirming that your remote has been paired successfully. How to Program your Silver Optimum TV Remote (with iO button) Power on your television Press and hold SEL and TV buttons for three seconds simultaneously. The iO button will illuminate After the iO button illuminates, point the remote at the TV and enter the three-digit code. If the code is correct, the television will shut down automatically. For verification, press the mute button which will turn on and off the television Press the TV button to store the code. To verify the code is stored, the iO button will blink twice How to Program Silver Optimum TV Remote using Auto-Search Programming Method? Auto-Search Programming method is used when the one-digit programming method is not working. To program your remote using the auto search programming method, follow the steps below. Power on your TV Press and hold the SEL and TV Power buttons simultaneously until the O button starts blinking Press and hold the SEL button for few seconds while pointing the remote at the TV After the TV turns off, you can release the SEL button Press the power button on the remote to verify. It should turn the television on and off. Verify that the remote is working for major TV functions including mute, power, and volume How to Change the Volume Controls on Optimum Remote? You can now control TV functions through your Optimum remote such as volume, mute, and power functions. However, if you wish to control the volume on the cable box instead of the TV, follow the steps below. Press CBL and SEL button simultaneously for three seconds until the iO button illuminates After the iO button lits up, point the remote towards the cable box and press the Vol button Press the CBL button, resulting in the iO button blinking to confirm the code is stored. Optimum Remote Replacement The availability of remote control models is based on your television service with Optimum. You can use various models with Optimum TV services. If your remote is not functioning properly make sure to check the batteries first and verify whether it's programmed properly or not. However, if everything is verified and still the issue persists, you can return it to the local Optimum Store and replace it. If your Optimum TV remote control is damaged, lost, or stolen, you will be charged \$2.50, which will be applied to your account. In case your Altice One remote control is lost, not returned, damaged, or stolen, you will be given a one-time grace replacement. However, if the replacement is being done for the second time, you will be charged \$10 to your account. How to Setup Parental Controls with Optimum Remote? If you are having kids at home, you might want to prevent them from viewing inappropriate channels, titles, or pay-per-view access. Here's how to set up parental control by setting up your pin. Double press Setting on your remote Use arrow buttons to select "Parental Controls" and press SEL Select "Set Pin" and press SEL on your remote Now enter and reenter your pin To change the pin, you can select "Modify Pin" and press SEL. Now enter your desired pin you wish to use. Frequently Asked Questions How to stop Altice remote from blinking? If your Altice remote is blinking continuously, do the following steps Replace batteries Reset box Reprogram your Altice remote Visit Optimum store How do I pair my Altice remote to my TV? 1. Power on the TV you wish to pair with your Altice remote 2. Press the Home button on your remote and navigate to settings 3. Select Remote and then select Pair Remote to Altice One 4. Press 7 and 9 simultaneously on remote for at least five seconds 5. Highlight "Pair remote control" and press select 6. Once paired, you will see the confirmation on the screen How do I contact Optimum customer service for any queries or assistance? In case of any assistance or queries, you can call Optimum customer support at 1-844-518-2667. Why is my Altice One not Working? In case you are getting a black screen, make sure that all Altice one and TV are plugged in and turned on. Also, verify that the connections are secure. If the issue still persists, restart your TV service. You can restart your TV service by holding and pressing the front panel of the box.
