I'm a control monster (or so my wife tells me). So when I heard that rooting your Android TV box gets you more control over your device, you got my attention. In my experience, rooting the Android device isn't for everyone. This applies to smartphones, as well as TV boxes or Smart TVs. Because Root Your Android DeviceFirst, let's get something off the road. Rooting and Android device is the same thing as jailbreaking an Apple device, It's just different ways of saving the same thing. You know how Apple likes to think differently. Or process gives you maximum power on your device, like: Install Custom ROM: Imagine a custom version of Android specific to your device. Sites like FreakTab have been creating custom ROMs for Android TV boxes right from the start. This is by far the best reason to root your Android TV box. Unlimited Customization: By deleting the device you can literally do something to it. If you want to install Samsung icons on your MINIX TV box, you can also do so. The sky is the limit. Better Battery Life: Rooting gives you control over applications that are the biggest battery clogs. You can get very tactical to prioritize the apps you use most frequently and hibernate the apps that are just wasting power. Overclocking: Overclocking is dial-up performance on the device's CPU to run faster than the manufacturer intended. I've been building and overclocking PCs for longer than I care to admit. It's fun to tweak the device to get every ounce of performance you can out of it. Remove any application: You can add or remove anything you want, even those nasty applications that are preinstalled by the manufacturer. Why not root your Android deviceWith great power comes great responsibility ... As much as you hate the obvious Spider-Man reference, it's really true here. Personally, I don't root my Android devices because I don't think the reward outweighs the risks. Many websites will only tell you the good parts about rooting, and conveniently leave out the bad parts. So you are aware, let's talk about the negatives here: Kiss your goodbye warranty: Deleting the device work and roid device. If you don't do them properly, there is a possibility that you could brick the device warranty. Period. You could brick the manufacturer's warranty. means unlocking the full potential of your TV box, now you have a weight of 150 dollars.
