My name is kim 0281-5755-5905 [note] looking for someone with a good rapa price that will allow you to visit their island Page 4 Okay only Ryken Ryken Come the Dodo code is 3Q46C I'm having a costume party. Please come to a costume income with empty pockets there are many free things about my island I need to get rid of me. You can fish diving or capture bugs and stores are open.HNT49 Å º 1996-2014, Amazon.com, Inc. or its affiliates in the animal cross: New lead, you could travel to a tropical island and find a variety of different fish, Bug and fruit. This island was always the same, permanently in summer all year. The Mystery Tour in Animal Attracing: New Horizons is an extension of this function, with a variety of deserted islands to visit (but inside your hemisphere and season). The islands of the Tourmystery are much smaller than your main island, but they are great to meet new villagers, collect extra resources and even make tons of money if you are lucky. We have rounded up our best tips for the desert island, as well as all types of islands of the Mystery tour we have found so far-table content [hide] for more animal crossing guides, make sure you check our guide hub. That connects our various features that explain and respond to some of the greatest topics of the game. Otherwise, read our animal crossed: New Horizons revision. How to travel in a deserted inserter Your airport is open (starting from the second day you play), you will be able to use a Nook miles ticket to go to a ' desert island . You can buy Tickets for Nook Miles for 2,000 miles Nook each at the Nook Stop Machine in Resident Services. Who you have a ticket, let's talk to Orville at the airport, select the "I want to fly!" Option, then select "Use the Nook miles ticket." You will therefore be wrong to a random island on your mysterious tour! These islands are available in a variety of styles ranging from a graceful basic for rare and profitable; We have detailed all kinds we have met so far. Keep in mind that an island is generated every time you buy a Nook miles ticket, which means you can't continue to reset the game to try to get a different island with the same Ticket.Can that checks what kind of island you have ? You may have heard that you can use reactions or other methods to the airport to increase your chances to get a rare or desirable island of mysterious tour. We tested this, and unfortunately, it is simply not true. You have to rely on a little luck or lots of nook miles if you are determined to get a particularly good island. What to do on a desert island for the type of island you get, there are some different approaches that you can take to make the most of your mysterious tour. No matter what, we advise you to empty your pockets of everything except for your tools, since there is no way to send or otherwise maintain resources beyond your pocket capacity once you have left the deserted island stock On the Resourcesdesderes Islands are fantastic for resource harvest. Each island can be completely emptied of resources without repercussions; You will never come to an island you've visited. As in your island, on the islands of the Mystery tour, you can collect weeds, branches of trees, wood, fruit, clay, stone and iron, as well as capturing insects and fish. You can also find a fossil buried in the ground or a do-it-yourself recipe in a bottle on the beach. You can even eat fruit on the island to get super resistance and digging trees to take home - including coconut trees you can plant on your beach. ToumyStia are a great way to get all the resources needed to build the creation of Nook's Cranny - which requires 30 iron and 30 of all three types of wood - in a short period of Extraction for these resources on a desert island is a great option once you have exhausted the resources of the island for the day. If your tools are consumed, you can create a little more with resources on the desert island or buy fragile tools for 100 Nook Miles each from Wilbur, the Dodo Airlines pilot. The tools purchased can still be updated with an iron nibble for the tall instrument-livello.meet New Villagersa great way to check who moves in your home is from The inhabitants of the specific villages themselves. You can find potential new inhabitants of the island on deserted islands that will be happy to enter your city, if requested, and if you don't ask, you can simply use more Tickets Nook miles to travel to the islands until you find one that you like .Villagers Only the volunteered eggs on the deserted islands if you have room for them to spend your main island and a plot chosen for a new home. If you have 10 inhabitants who live on your island or no open plots, you will not find anyone on these Islands.Seek out better weatherWhile is not guaranteed, time in a given Mystery Island Tour can be different from that of your island. This can be useful for the search for fish or insects that lay eggs in different different weather conditions - for example, if it rains on your island and you want to capture shy rain bugs.Make MoneySome Mystery Tour is located full of opportunities to make money. So it should be looking for some of the most profitable types of islands. Below, we have outlined the types of islands we have found so far and what different opportunities can be found on each edeserted Typeswhere island are different types of Mystery Tour islands can be encountered, with some more rare than others. No matter what island you get, we recommend at least hit all the rocks - like iron and gold nuggets are a relatively scarce resource - and the shore scan for DIY recipes before leave.Standard IslandsSometimes, you just need a nice normal island . These islands will have your original fruit, your native flower, a normal assortment of trees, and a base river with no apparent difference in the type or frequency of bugs and fish lays the eggs. There will be a couple of rocks, each of which contains resources (without money stones, in other words), and a tree will have mobile in it. Many of these islands will also have a fossil, while the most rare islands usually do n't.Spiral Iceland sort of series island, there is a layout in which the river flows in a spiral with a stone at the center of the Island. We have not noticed a big difference in what you can get on these islands, but maybe they will inspire some of your islands designs along the road.Cliff Islando apparently a subset of the island's standard, we found islands that are first cliffs, with Most of the river up to the cliffs as well. While everything else is normal enough, you will have a easier time to grind for rocky rugged fish with this layout.Rock Islandwe have also met an island that has just a pile of rocks in the middle on top of one cliff. All rocks contain handicrafts, in a new way, without money Rocks.Foreign fruit islandthis is slightly more rare. Otherwise it is a normal island, with the exception of all the trees are fruit trees - and it is a different fruit from the native one for your island! You can collect fruits and take it home to sell or implant (it is advisable to plant before). The kind of foreign fruit can be found depends on what your original fruit is and could be considered "sister" fruit of your island - for example, if the original fruit is apples, your sister fruit is oranges, e You will find only the oranges on these Islands.There are five possible fruit - apples, oranges, peaches, cherries and pears - and the four fruits that are not native your island sell for 500 bells each. Reporting and planting these foreign fruit trees can be a great way to do some real money. If you want to dig the whole tree and bring it back with you, we advise you to eat coconuts to get the strength to do so; Coconuts are less valuable than Fruits.Bamboo Foreign IslandsomeWhat Common, the island of bamboo has Bamboo on it - né rivers or ponds, even if they do not have rocks, coconut palms, and sometimes fossils. You can dig bamboo sprouts and planting them on your island, or you can eat some coconuts and dig the bamboo trees Whole.bamboo is an important resource in realization, so it's also a good idea to take a fragile or dark stone at bamboo trees and harvested so bamboo as it is possible while you are The lack of fresh water here could be inconvenient if you are thinking of fishing, but in reality it is the ideal island to create your own tarantula right farm now.Hybrid flower islandeve more rare is an island covered with hybrid flowers - pink, Black, orange, purple flowers, or blue whose seeds cannot be purchased from Timmy and Tommy. They will usually accompanied by butterflies, many of which lay eggs only about these rare hybrid flowers. In addition to the capture of these butterflies, which should check a good price, you should dig and take home a couple of every color so you can keep the catch of rare butterflies at home. These hybrid Mystery Island flowers can be used to raise even more rare hybrid flowers, so be sure to keep track of all the flowers you take from a mystery tour.You manages to find only two different species of flowers on Mystery Tour islands : Your native flower (the type you can find on your cliffs at the beginning of the game) and your "sister" flower, which is generated when you start the game. This means that you can only find hybrid flowering islands of these two species of flowers as well. For more details on native flowers and sisters as well as hybrids, consult our full guide to hybrid flowers and flowers breeding.Money rock islandif ever find an island where there is a group of rocks in the center, surrounded by a river then they hit the jackpot. Those rocks are all the rocks of money, just like that rock that lays the eggs every day on the main island.to reach the vehicle, it is necessary to destroy that rock blocking the path; You can do this to eat a piece of fruit and hit the rock with a shovel. Once you have smashed the rock you can use the jump with the auction to reach the center. Make sure you dig a few holes directly behind you before you start hitting every rock - this will be hit them you can hit rapid succession and get the whole 16,100 bells every rock island Tarantula Islandan to feed your nightmares, the island Tarantula is inhabited by an apparently infinite number of Tarantulas. They sell for 8,000 bells each, in a capture way as many as you can bring. This is absolutely one of the Jackpot islands, even if it is a bit disturbing. If you don't land on this for pure case, there are actually ways to create your Isola Tarantola, although a new creature introduced in April you broke tarantula agriculture spawn rates for the northern hemisphere players.Scorpion Islandsimilar At the island Tarantula, the scorpion island is covered in, well, scorpions. They also sell for 8,000 bells every (or 12,000 to flick), so you should take as many as you can take if you are lucky enough to have this rare island. Note that the Scorpio season lasts half of the year, both Mag-Oct (North Hemisphere) or in November to April (South); The other half of the year is tarantula season. Because of this, you always have the possibility of getting one of these Jackpot Bug Island Year-Round.Trash Islandthis appears to be normal and consists of regular trees and flowers like any other island; The problem is that the river, lake and sea are full of garbage. Fishing in this island will produce only the garbage elements (cans, tires, and boots). The advantage is that, with the capture of a pile of garbage, you will at least unlock some DIY recipes. GAMESPOT can get a commission from retail offers. Offers.
