657 country code

Image: Sam Spicer/Moment/Getty Images When you're out and about in the countryside, it's very important not to mess up things there. After all, fields and forests are beautiful, but they are also two important things: a place of business, and a priceless ecosystem. This means that careless behavior can cause unspeakable damage. For example, leaving a gate open can let out valuable livestock and result in people or animals getting hurt. Trampling through a certain type of field at the wrong time can kill delicate and rare flowers. Going off the path can result in erosion of grasslands and other plants and disruption of wildlife.The Country Code (sometimes also called The Countryside Code) is a uniquely British solution to this that came about in the 1930s. It was a product of three factors. First, urbanization meant more people were out of touch with nature and thus needed advice on how to treat it properly and get the most out of it. Second, workers' rights and increased worker wealth meant people had leisure time and wanted to spend it somewhere different than their usual neighborhood. Third, the advent of affordable mass transit and motor vehicles gave countryside access to far more people.The code has been updated many times in its nearly 90-year life, so it is still a current and useful guide. Do you know how to be a good neighbor to the birds, the bees, and the buttercups? Copyright © 2021 InfoSpace Holdings, LLC, a System1 Company Wired's latest cover story has a lofty title: "The End Of Code."The lengthy feature maps the evolution of technology and computing, and makes the claim that coding as we know it will likely come to an end, thanks to artificial intelligence and machine learning, which trains computers to do the heavy lifting. Jason Tanz writes, "Our machines are starting to speak a different language now, one that even the best coders can't fully understand. "New York Magazine's Brian Feldman brings up an important point, however. In his estimation, this doesn't actually mean that coding is done for, just that the people and companies wiring these smart machines will become even more revered than coding and developer culture is now. He writes: Who constructs and maintains these supposedly revolutionary neural networks? The answer is developers and engineers—people who possess the sort of specialized computer know-how that Wired argues will soon be a thing of the past. That's not eradicating code as we know it; that's sending it one level deeper into bureaucratic obfuscation. In short, coding is, and will be, alive and well. Last Updated on December 18, 2020 Technology has taken a vantage leap in providing solutions for man. Before now, technology used to appear complex and would require a great deal of expertise to handle solutions available. Today, we have technology applicable in the simplest human activities as smart products with intelligent algorithms powering them as they make error-free judgments and provide intelligent and analytic solutions.Does technology have all the answers?This article from Credit Suisse, tells us that technology does not have all the answers because it has been found to exhibit "similar biases," as humans. No one can discredit the impact of technology, but it is not totally free of human input and this is the reason we experience these biases in many areas we have technology holding foot. Creating technological solutions transparentlyThis article suggests that the process of creating technological solutions be made transparent and subject to contribution from many people who would end up as users of the product - male, female, young, old, learned, unlearned and all other preferences as we have them. It also underscores the importance of having women on product development teams. This approach is not sure to eliminate all forms of bias, but it is a good way to start in order to appraise the full benefits of technology. Technology as the connecting toolTechnology so far has been a major connecting tool amongst us humans. It is used and appreciated by all regardless of race, language and sex. In order to keep it less subjective to these arguments about human biases. I believe we should gather opinions on products and solutions before making them available to the public. This could be done by gathering input from intended target users and receiving feedback across the stages of production. "Recognizing the problem is a start...success will depend on inclusive technologies that meet this vast untapped market." This cannot be more apt especially at a time when we look up to technology for solutions. We should not muzzle our progress with technology by battling algorithm bias. The first way to avoid this battle is by reading this article here. Each country has its three-letter abbreviation or code that is used during The Olympic Games to represent that country. The following is a list of the 204 "countries" that are recognized by the IOC (International Olympic Committee) as National Olympic Committees. An asterisk (*) indicates a territory and not an independent country; a listing of the independent countries of the world is available. Afghanistan - AFG Albania - ALB Algeria - ALG American Samoa* - ASA Andorra - AND Angola - ANG Antigua and Barbuda - ANT Argentina - ARG Armenia - ARM Aruba* - ARU Australia - AUS Austria - AUT Azerbaijan - AZE The Bahamas - BAH Bahrain - BRN Bangladesh - BAN Barbados - BAR Belarus - BLR Belgium - BEL Belize - BIZ Bermuda* - BER Benin - BEN Bhutan - BHU Bolivia - BOL Bosnia and Herzegovina - BIH Botswana - BOT Brazil - BRA The British Virgin Islands* - IVB Brunei - BRU Bulgaria - BUL Burkina Faso - BUR Burundi - BDI Cambodia - CAM Cameroon - CMR Canada - CAN Cape Verde - CPV Cayman Islands* - CAY Central African Republic - CAF Chad - CHA Chile - CHI China - CHN Colombia - COL Comoros - COM Congo, Republic of the - CGO Congo, Democratic Republic of the - COD The Cook Islands* - COK Costa Rica - CRC Cote d'Ivoire - CIV Croatia - CRO Cuba - CUB Cyprus - CYP Czech Republic - CZE Denmark - DEN Djibouti - DJI Dominica - DMA The Dominican Republic - DOM East Timor (Timor-Leste) - TLS Ecuador - ECU Egypt - EGY El Salvador - ESA Equatorial Guinea - GEQ Eritrea - ERI Estonia - EST Ethiopia - ETH Fiji - FIJ Finland - FIN France - FRA Gabon - GAB The Gambia - GAM Georgia - GEO Germany - GER Ghana - GHA Greece - GRE Grenada - GRN Guam* - GUM Guatemala - GUA Guinea - GUI Guinea-Bissau - GBS Guyana - GUY Haiti - HAI Honduras - HON Hong Kong* - HKG Hungary - HUN Iceland - ISL India - IND Indonesia - INA Iran - IRI Iraq - IRQ Ireland - IRL Israel - ISR Italy - ITA Jamaica - JAM Japan - JPN Jordan - JOR Kazakhstan - KAZ Kenya - KEN Kiribati - KIR Korea, North (PDR of Korea) - PRK Korea, South - KOR Kuwait - KUW Kyrgyzstan - KGZ Laos - LAO Latvia - LAT Lebanon - LIB Lesotho - LES Liberia - LBR Libya - LBA Liechtenstein - LIE Lithuania - LTU Luxembourg - LUX Macedonia - MKD (Officially: Former Yugoslav Republic of Macedonia) Madagascar - MAD Malawi - MAW Malaysia - MAS The Maldives - MDV Mali - MLI Malta - MLT Marshall Islands - MHL Mauritania - MTN Mauritius - MRI Mexico - MEX Federated States of Micronesia - FSM Moldova - MDA Monaco - MON Mongolia - MCL Montenegro - MNE Morocco - MAR Mozambique - MOZ Myanmar (Burma) - MYA Namibia - NAM Nauru - NRU Nepal - NEP Netherlands - NED New Zealand - NZL Nicaragua - NCA Niger - NIC Nigeria - NGR Norway - NOR Oman - OMA Pakistan - PAK Palau - PLW Palestine* - PLE Panama - PAN Papua New Guinea - PNG Paraguay - PAR Peru - PER Philippines - PHI Poland - POL Portugal - POR Puerto Rico* - PUR Qatar - QAT Romania - ROU Russian Federation - RUS Rwanda - RWA Saint Kitts and Nevis - SKN Saint Lucia - LCA Saint Vincent and the Grenadines - VIN Samoa - SAM San Marino - SMR Sao Tome and Principe - STP Saudi Arabia - KSA Senegal - SEN Serbia - SRB Seychelles - SEY Sierra Leone - SLE Singapore - SIN Slovakia - SVK Slovenia - SLO Solomon Islands - SOL Somalia - SOM South Africa - RSA Spain - ESP Sri Lanka - SRI Sudan - SUD Suriname - SUR Swaziland - SWZ Sweden - SWE Switzerland - SUI Syria - SYR Taiwan (Chinese Taipei) - TPE Tajikistan - TJK Tanzania - TAN Thailand - THA Togo - TOG Tonga - TGA Trinidad and Tobago - TRI Tunisia - TUN Turkey - TUR Turkmenistan - TKM Tuvalu - TUV Uganda - UGA Ukraine - UKR United Arab Emirates - UAE United Kingdom (Great Britain) - GBR United States - USA Uruguay - URU Uzbekistan - UZB Vanuatu - VAN Venezuela - VEN Vietnam - VIE Virgin Islands* - ISV Yemen - YEM Zambia - ZAM Zimbabwe - ZIM The territory formerly known as Netherlands Antilles (AHO) was dissolved in 2010 and subsequently lost its status as an official National Olympic Committee in 2011. The Olympic Committee of Kosovo (OCK) was established in 2003 but as of this writing, remains unrecognized as a National Olympic Committee due to Serbia's dispute over Kosovo's independence. Question: What are international country codes? How do I dial an international call? Answer: International calling codes, or country codes, are digits that must be dialed to reach a telephone number in another country. If you're in France and want to call the U.S., for instance, you must dial the U.S. country code before dialing the U.S. phone number. For calls to other countries, dial the country code, city code (similar to an area code), and the local number. For example: In order to make a phone call to Cordoba, in Spain: Dial 34 (the country code) Dial 957 (the city code) Dial the phone number This should hook you up with most phones in the Western world; naturally, there are exceptions as well as other rules, depending on where (geographically) you're calling and the kind of telephone you're calling. Jot down the calling code of each country you will be visiting and carry it with you - your itinerary is a handy spot. Remember to drop the zero from the country code. Example: UK—country code 44 France—country code 33 Turkey—country code 90 Write down the US calling code, too—you'll need it to call home: US country code —+1 (seems easy, but believe it or not, I forgot)—Remember to dial the US country code and then the area code before dialing the phone number If you need to call abroad while you're traveling, find out how an unlocked phone and local SIM card can save you money. Local SIM cards are cheaper and have inexpensive data and phone call rates compared to paying roaming fees from your mobile provider at home. Consider using communication mobile applications like WhatsApp or Skype. These services offer the option to make calls over wifi or internet data plan for calling internationally and locally for low or no cost. "An amazing invention - but who would ever want to use one?" --President Rutherford B. Hayes on telephones, 1876 Edited by Lauren Juliff. Thanks for letting us know!
